MS4 OPERATOR INFORMATION:

Village of Justice
Department of Public Works
8748 W. 82nd Pl
Justice, IL 60458

A. CHANGES TO BEST MANAGEMENT PRACTICES

There are no changes to the BMP.

1. Public Education and Outreach

The Village of Justice has distributed four (3) storm water/EPA informative articles, through the 2018-2019 Village of Justice Newsletter Edition: "Safe Disposal of Medicine", "Green Tips", "Green Infrastructure" and "Ten Things You Should Know about Mold".

The newsletter is available for residents at the Village Hall and the Public Works Department.

Residents are receiving a newsletter with their sewer/refuse bill.

The Village website is updated on a regular basis.

In 2015 the Village of Justice opened an official Facebook page.

This site is very popular.

2. Public Participation/Involvement

The Village of Justice conducts monthly meetings on the 2nd and 4th Monday of each month.

Meetings are open to the public, comments and suggestions are welcome.

The Village of Justice also conducts monthly Economic Development meetings.

This is a very valuable way to talk to the residents and businesses as well.

At these meetings residents have the chance to find out valuable information concerning storm water.

The "Rain Barrel" program is still available for our residents.

Pollution prevention, recycling, hazardous material disposal, etc.

Before and during any street construction, residents are notified, via flyers distributed to each household, With all information regarding each project.

3. Illicit Discharge Detection and Elimination

Public Works Department continues a “Storm Water Maintenance Program” created by Hoeffler-Butler Engineering, Inc.

Lyons Township, working together with the Village of Justice Public Works Dept., hires teenagers for the summer to help with grass cutting and maintaining our storm water system.

Usually we have 4-5 teenagers who help us keep the storm water system clean and mow the grass.

Grass is cut in detention ponds, ditches, right of ways along with all Village properties.

4. Construction Site Runoff Control

Construction sites are inspected before and during, all construction.

Public Works Director is the Certified Storm Water Inspector.

The Building Commissioner, Code Enforcement Officer, Deputy Code Enforcement Inspector, Building Inspectors, Public Works Department and the

Village Engineer review all blueprints before issuing a permit.

Deputy Code Enforcement Inspector is correcting problems related to rodents, garbage, environmental pollution, etc.

Village Code of Ordinance is updated.

5. Post-Construction Runoff Control

Building Department and Public Works Department complete inspections of all sites after construction is complete.

6. Pollution Prevention/Good Housekeeping

The Village of Justice regularly checks and maintains all storm water drains, ditches, culverts, manholes, and detention areas following the “Storm Water Maintenance Program”.

In 2018 the Public Works Department televised approx. 6,563 lf of sanitary sewer and approx. 600 lf of the storm sewer.

We performed the following repairs after televising:

- 5 point repairs, approx... 50' of 8 inch and 10' of 6 inch
- 470 lf of Cured in Place Pipe Lining

Attached you can find the following items for your review.

1. Annual Facility Inspection Report
2. Reporting period: March, 2018 to March, 2019
3. Copy of the articles in 2018 Village newsletter (3)
4. Copy of “Notice of Street Closure” (2)

The Village of Justice is not relying on any other government entity to satisfy some of our permit obligations. If you have any questions or comments please call me at 708-458-2961

Sincerely

Joe Cekus
Director of Public Works
