

- ❖ **Electrical Inspector** - Reviews all electrical drawings and plans brought in by residents and contractors for new construction, additions, and the installation of fire alarms and burglar alarms. He prepares the necessary electrical permits for these projects, performs inspections for all electrical installations, including new electrical services and upgrades; he is on call during regular working hours for resident and contractor questions; and responds to all emergency calls, including fires and disasters, when requested. The electrical inspector is a member of the South Suburban Electrical Inspectors Association.
