

COUNTERFEIT CURRENCY

There has been a recent influx of counterfeit currency in circulation in Justice and surrounding communities. This is especially true with larger denomination bills such as \$50.00 and \$100.00. If you suspect that currency that you receive might be counterfeit, please contact your local Police Department or the United States Secret Service field office.

For more information on counterfeit currency and ways to help you identify it, you can contact your financial banking institution or go to the United States Secret Service Financial Crimes Division web site at www.secretservice.gov and click on the 'Know Your Money' link located under the Investigations tab.
